Creates notes with rich formatting options You start off by filling out a large, empty field in which you can enter content. Upon filling in the content, a list of notes is then displayed, and you can start scrolling to your heart's content. Formatting options allow you to highlight text, add bold, italics, underline and other text formatting options. When you start writing an item in the list, a new, empty note is then created. You can do so at any time, and you can get more notes by simply adding a new one to the list. The app ensures the content doesn't disappear after you create notes. So, one thing you need to do when using the program is to add new notes, and this is done by simply tapping the plus button which appears on the far right of the screen.
